

**YOUR WATER COOLED CORNELIUS  
ICE MAKER MUST BE "RESET" AFTER  
ANY MOMENTARY INTERRUPTION  
IN YOUR WATER SERVICE**

**If your icemaker has stopped producing ice,  
please follow the instructions below before  
you call for service.**

- 1. Disconnect power to the ice machine.  
(unplug the machine or turn off the circuit  
breaker to the machine)**
- 2. Locate the red reset switch inside the ice  
maker (remove the right side black panel  
or the front panel. The switch is red with  
2 blue wires coming out of it)**
- 3. Push the red button until you hear/feel it  
click**
- 4. Replace the panel(s)**
- 5. Reconnect power to the ice machine**

**The machine should now drop 1 batch of ice in  
20 minutes or less. If not, call us for service.**
